

*You know us for our telephone systems, cabling,
cameras, and access controls.....
but we're more than just systems.*

What will you do when disaster strikes?

- 1) Are you familiar with cloud services?
- 2) If so, do you currently use the cloud for any of your applications?
 - Are you considering expanding the use of the cloud for your business?
- 3) If you do not currently use the cloud have you considered moving?
 - What concerns do you have about moving to the cloud?
- 4) Do you have a disaster recovery plan?
- 5) How do you back up your data?
- 6) If applicable, how do you handle compliance and security requirements like PCI and HIPAA?
- 7) Are any of your hardware or software licenses about to expire?
 - Are you thinking about buying new servers?
- 8) Do you experience power outages or brown outs?
- 9) Are you planning on expanding your business?
- 10) Do you experience seasonal spikes that affect your business?
- 11) Do you have an IT department? If not, how do you manage your IT requirements?
 - If so, are they able to keep you up-to-date with all your IT needs?
- 12) How fast do you need your data backed up and running?
 - Can your business be down 4 hours? 20 minutes?
